1. Introduction:

OVERVIEW:

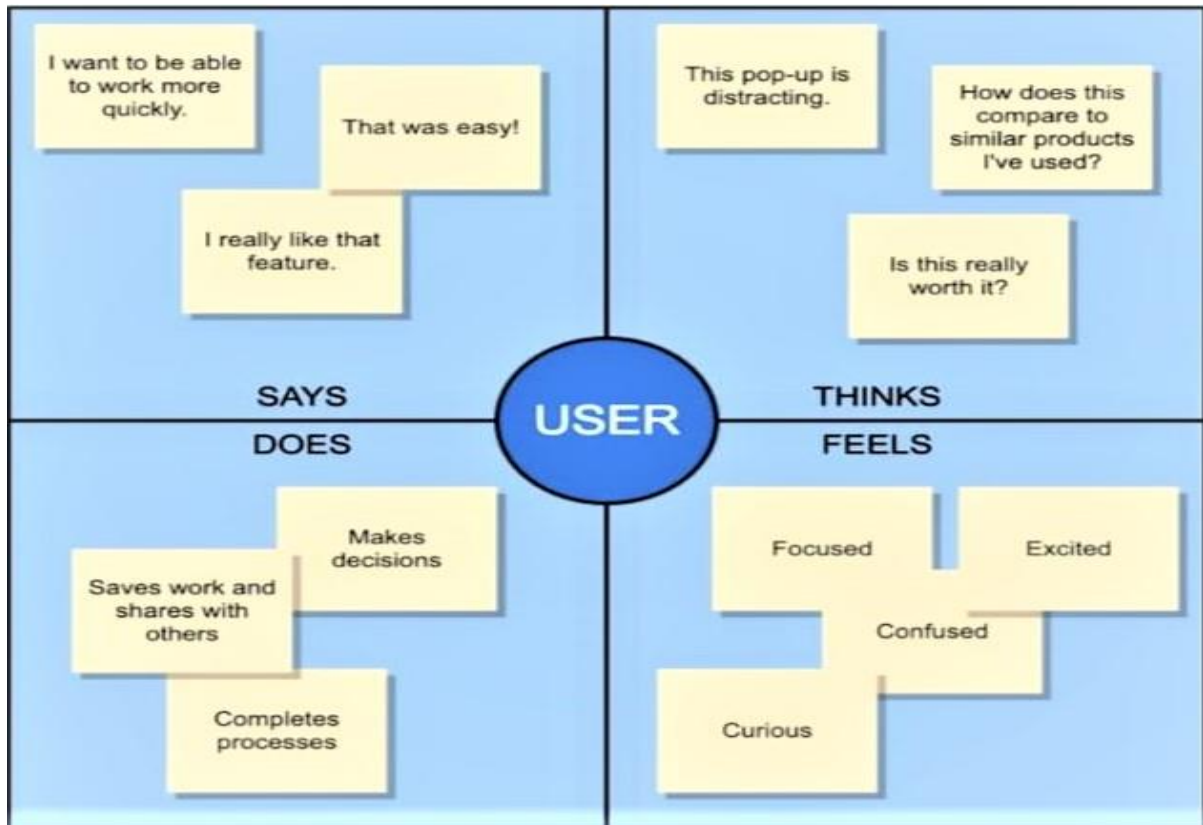

The improved features of CRM software have increased both its complexity and necessity. Nearly half of CRM implementation campaigns suffer from improper preparation and misaligned objectives among internal stakeholders. A properly conceived CRM implementation strategy covers the breakdowns of its goals, research, strategy, development and future. This article is for small business owners who want to make sure they are taking the right steps when implementing a new CRM system

PURPOSE:

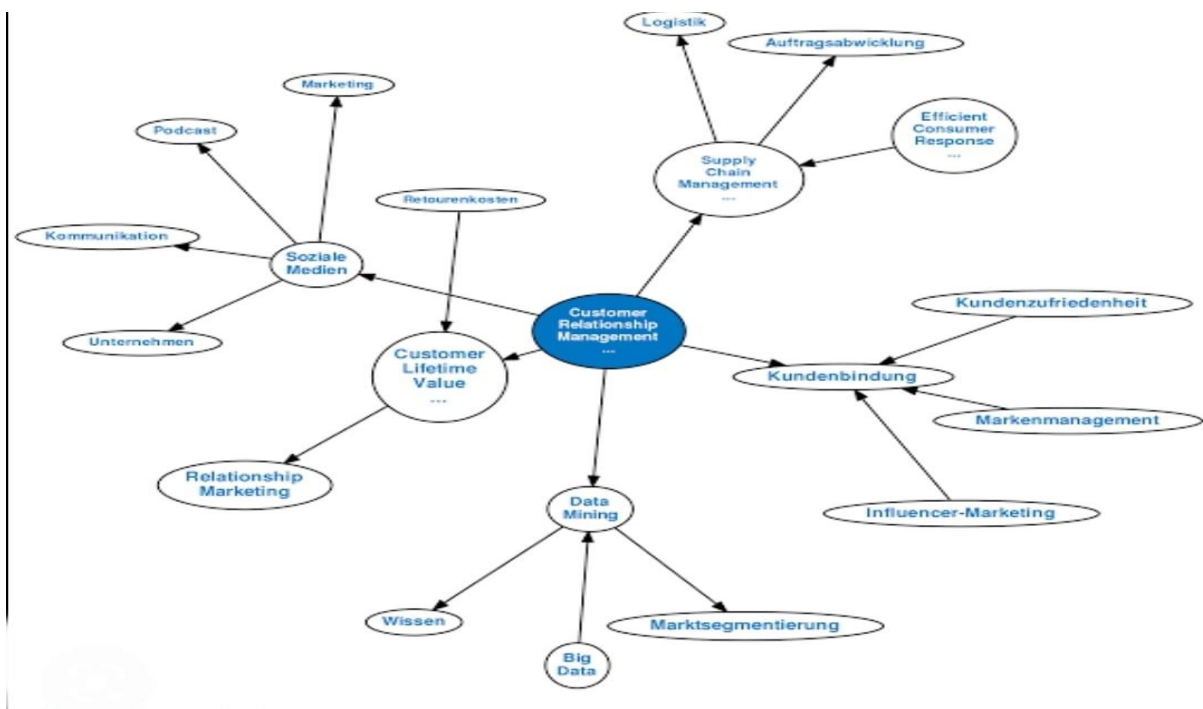

It saves a lot of time. The purpose of the project is to manage the school student's result tracking process in the easy way. Students do not need to check the notice board and everyone will stay updated this is the main purpose of this project. Can work easily. Increase candidate quality

2. Problem Definition & Design Thinking

[2.1 Empathy map](#)

2.2 Ideation & brainstorming map

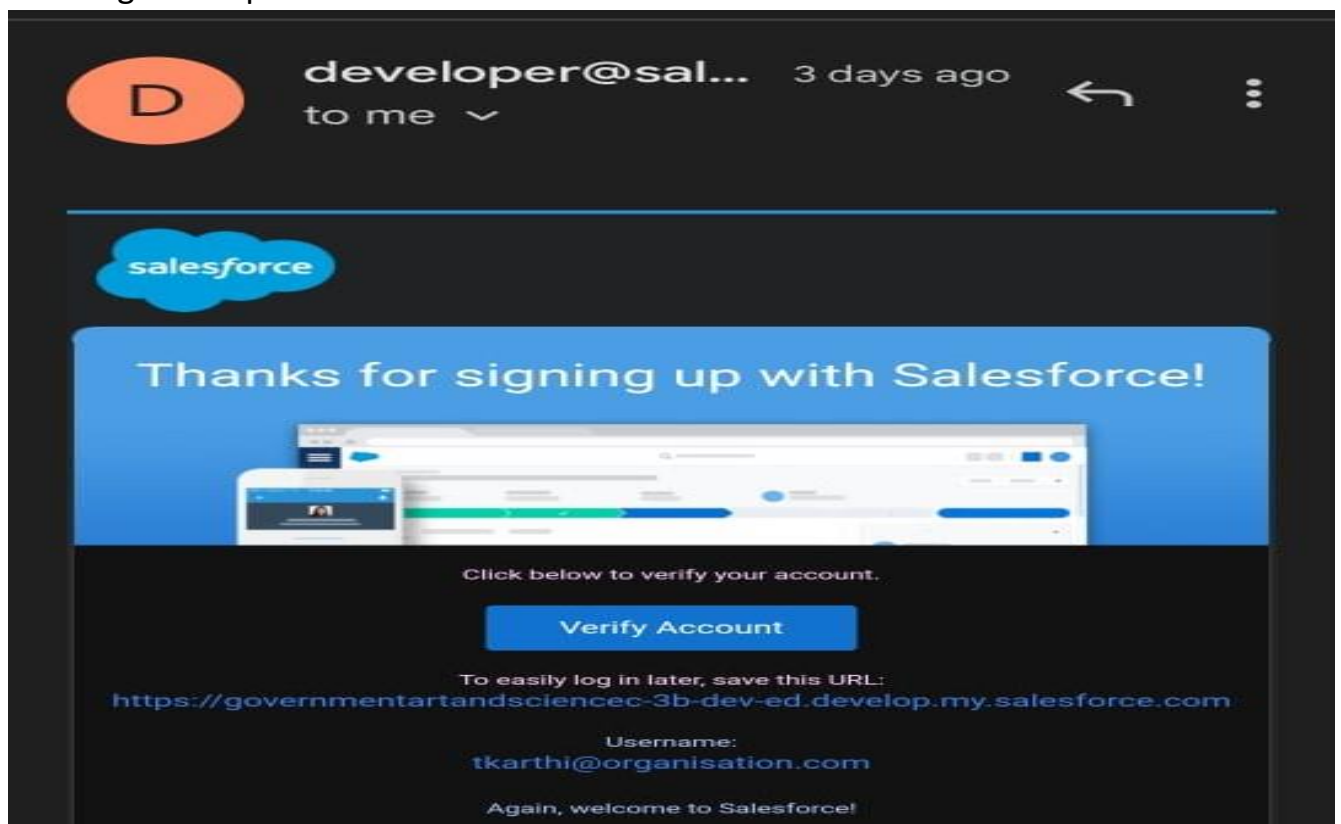

3. RESULT

3.1 Data Model

Object name	Fields in the object	
COURSE DETAILS	Field Label	Data type
	Course name	Text
	Course id	Text
INTERNAL RESULTS	Field Lable	Data Type
	Candidate Id	Text
	Course Id	Text
	Marks	Text

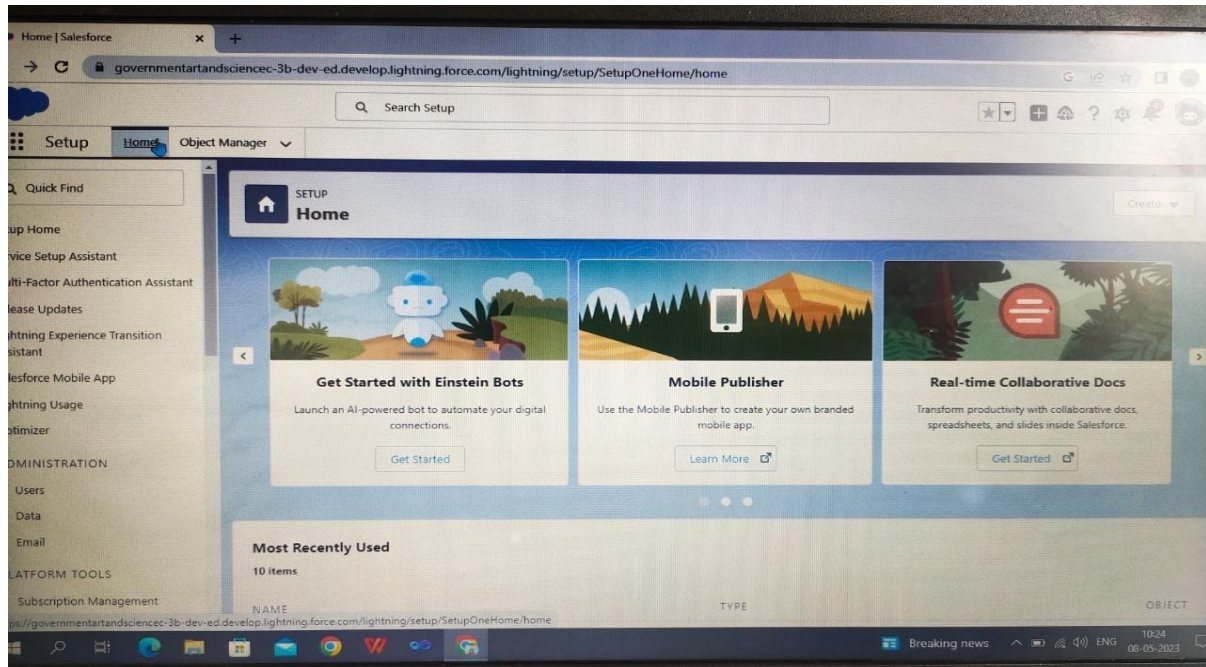

3.2Activity & Screenshot

Creating developer account

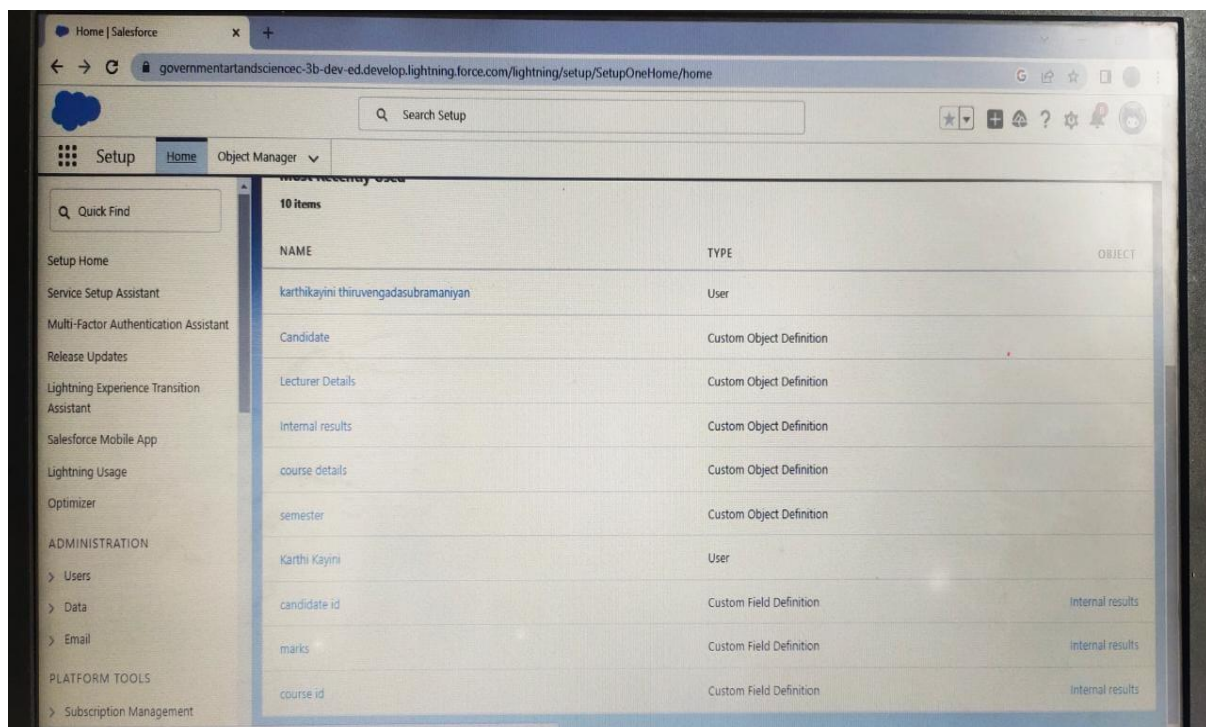

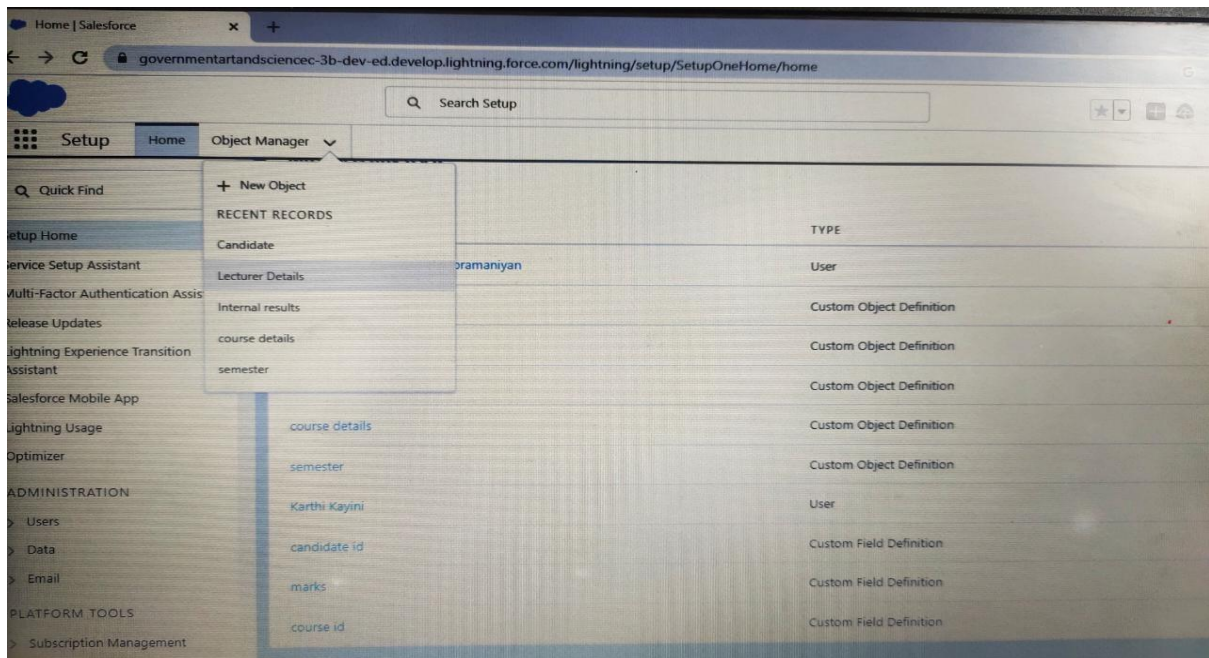

Using this <https://developer.salesforce.com/> link we sign up the sales force platform and finally. we get the verification mail that shown in the figure

SALESFORCE LOGIN:

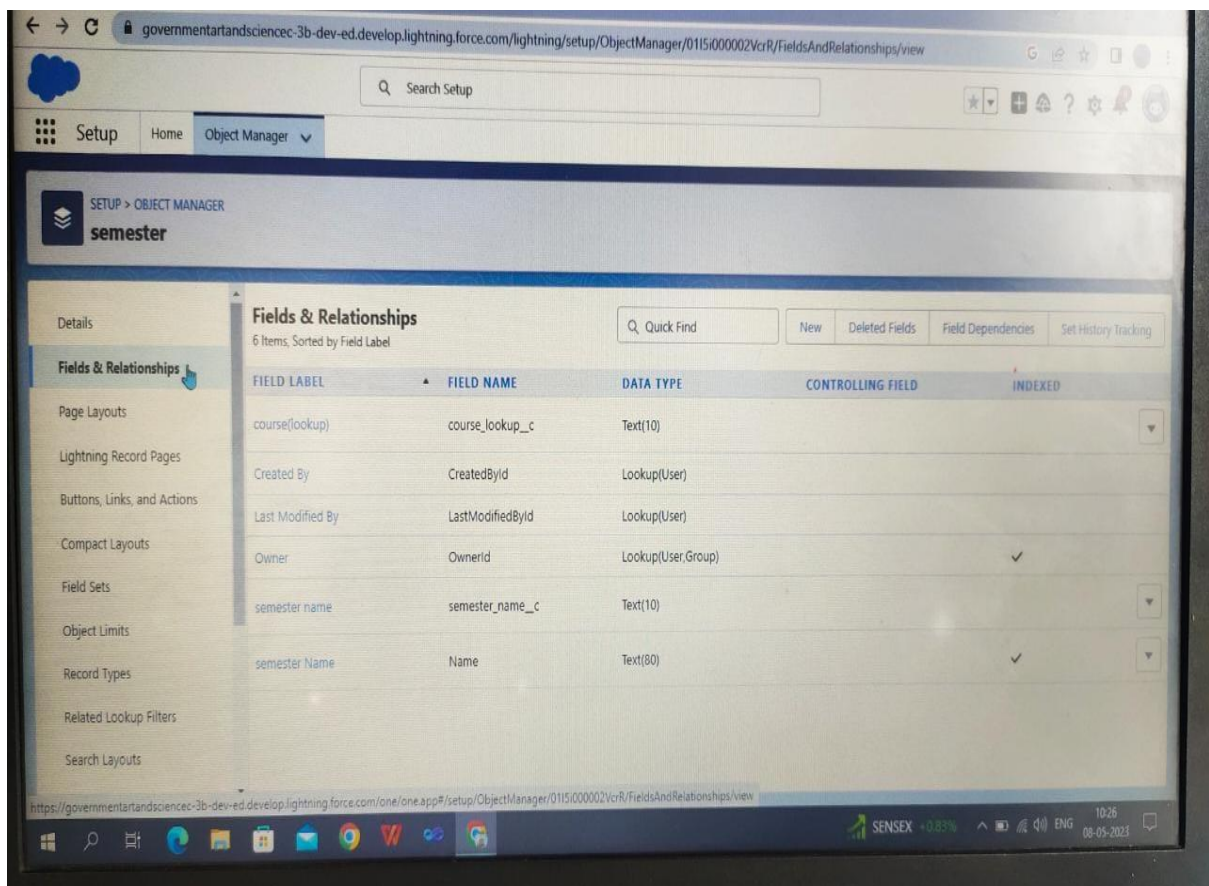

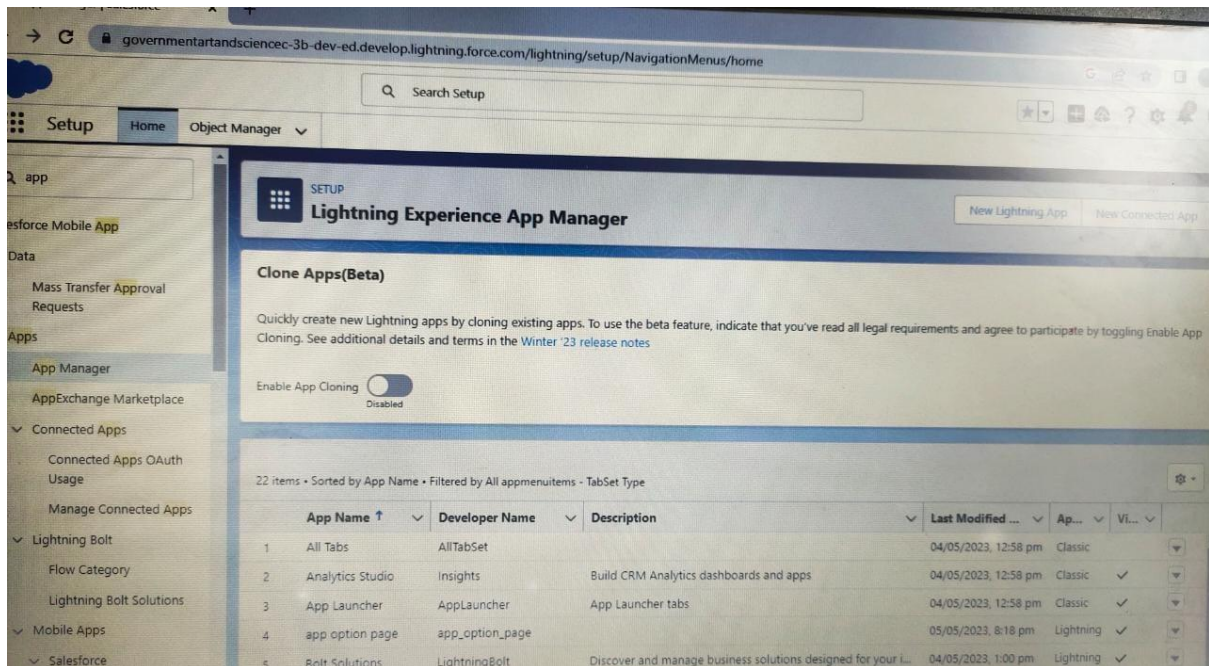

OBJECT:

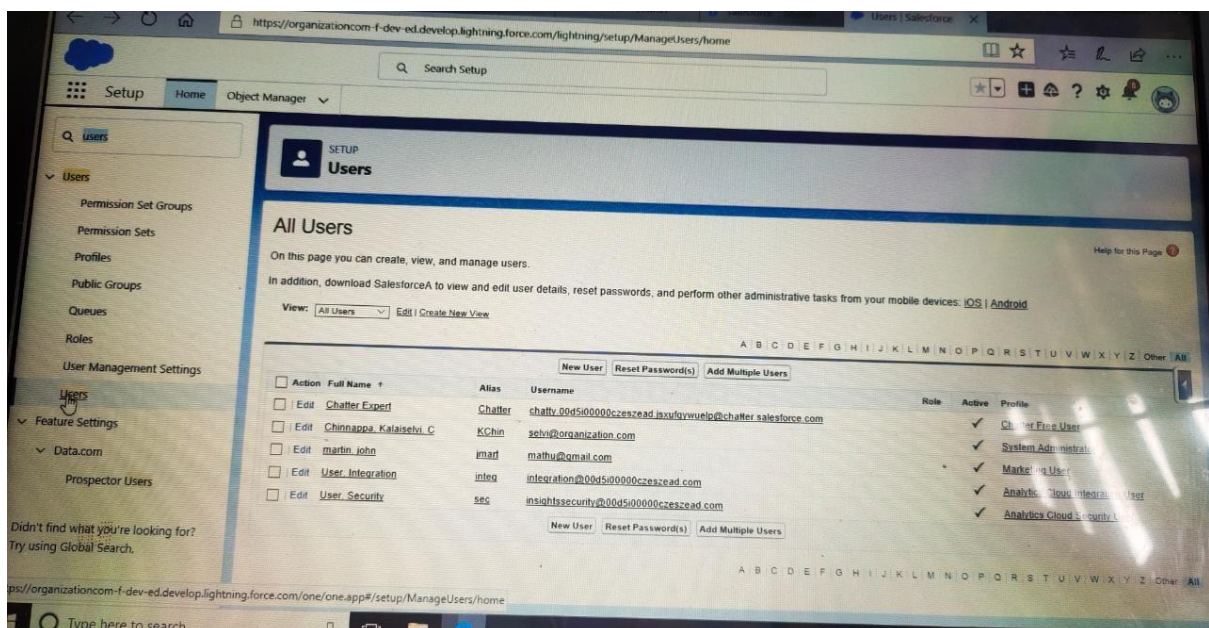

APP MANAGER:

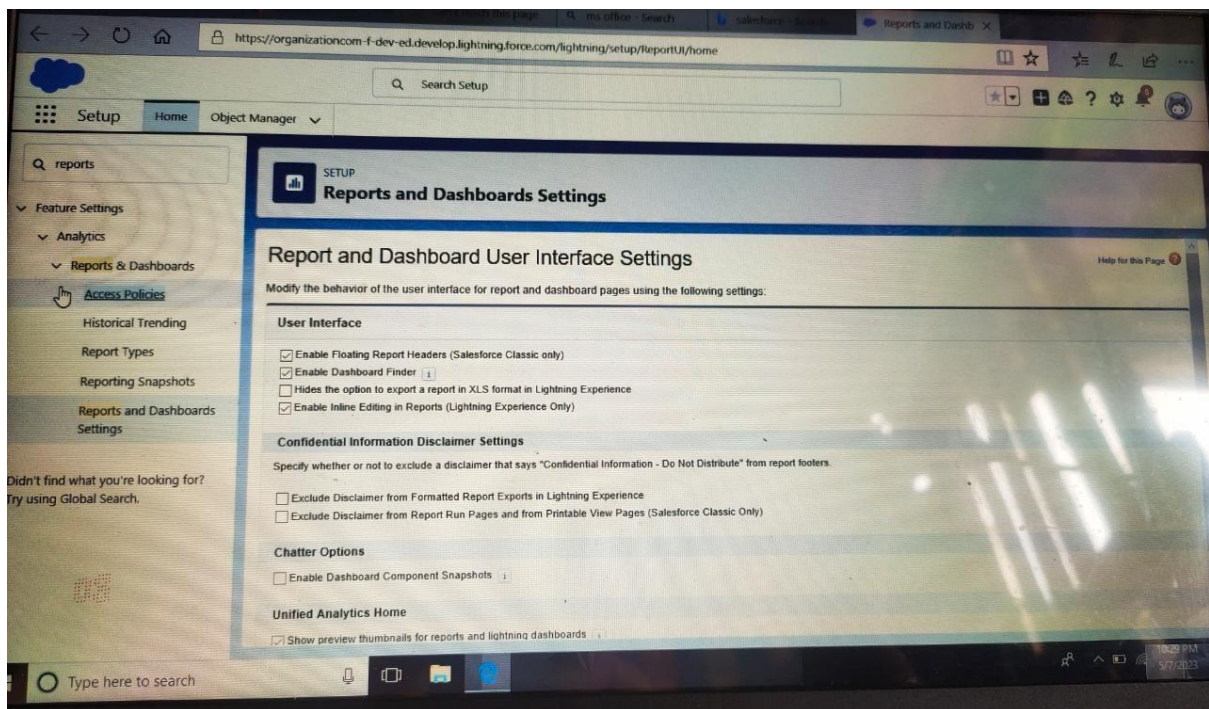

Relationships are created by creating custom relationship fields on an object. This is done so that when users view records, they can also see and access related data

We create the users in John Martin

From the report tab we create report type as students with school and parents report. They are checked by click the run button
